ClipVe Launch Press Release

FOR IMMEDIATE RELEASE

ClipVe now clips TikTok LIVE, alongside Twitch, Kick, YouTube and Rumble

The desktop app for clipping live streams after the moment happens, on Mac and Windows. Free to start, no account needed.

DULUTH, Ga., Nov. 10, 2026 - Nemexis, LLC today announced TikTok LIVE support in ClipVe, its desktop app for Mac and Windows built for clippers and streamers who need to catch a moment the second it happens. ClipVe launched Oct. 17 with Twitch, Kick, YouTube and Rumble.

Live moments don't wait. Platform clip tools are limited, and pulling clips out of a four-hour VOD after the stream ends means the moment is already old. ClipVe holds a rolling buffer of each stream on the user's computer, so the moment is still there after it happens.

What ClipVe does:

- **Clip what already happened.** A rolling buffer keeps the last stretch of every stream you're watching: 30 seconds on Free, up to 10 minutes on ClipVe Pro.
- **Watch several streams at once.** TikTok LIVE, Twitch, Kick, YouTube and Rumble side by side in one deck, up to five at a time on Pro.
- **Ready for vertical.** Crop to 9:16, stack the face cam over gameplay, add text and save an MP4 ready for TikTok, Shorts or Reels.
- **Clip hands-free.** Say "ClipVe that" and Voice Clip saves the moment (Pro).
- **Everything stays local.** Video and clips never leave your computer. No uploads, no cloud, no OBS.

"A great moment on a stream is whatever the person watching says it is," said Patrick Vanderhorst, founder of ClipVe. "ClipVe keeps the stream on your machine, so when the moment happens you clip it, crop it and post it before chat has moved on."

ClipVe is free to download at clipve.com with no account required. Founding members get ClipVe Pro for $5 a month or $49 a year, locked in for as long as they stay subscribed, or $149 once for Founder Lifetime. Founder pricing runs until Jan. 1, 2027, or until founder spots run out.

About Nemexis, LLC

Nemexis, LLC is an independent software company in Duluth, Georgia, founded by Patrick Vanderhorst. It builds fast, privacy-first desktop tools for creators.
