About ClipVe

Short (one line) Copy

ClipVe is a Mac and Windows app that keeps a rolling buffer of Twitch, Kick, YouTube, Rumble and TikTok LIVE streams on your computer, so you can clip a moment after it happens and have it ready to post in under 30 seconds.

Boilerplate (about 100 words) Copy

ClipVe is a desktop app for clipping live streams on Mac and Windows, built by Nemexis, LLC. Watch Twitch, Kick, YouTube, Rumble and TikTok LIVE side by side while ClipVe holds a rolling buffer of each stream on your computer, so when something happens you can still clip it after it's gone. Crop to 9:16, 4:5, 1:1 or 16:9, stack the face cam over gameplay, add text and save an MP4 ready for TikTok, Shorts or Reels in under 30 seconds. No OBS, no waiting on the VOD, no uploads. Video never leaves your machine. Free to start, no account needed.

03

What ClipVe does

Go back. Cut it. Keep it.

Watch up to five streams at once

One stream on stage, four more live in the dock. Press `1` to `4` to swap.

1

Clip it after it happens.

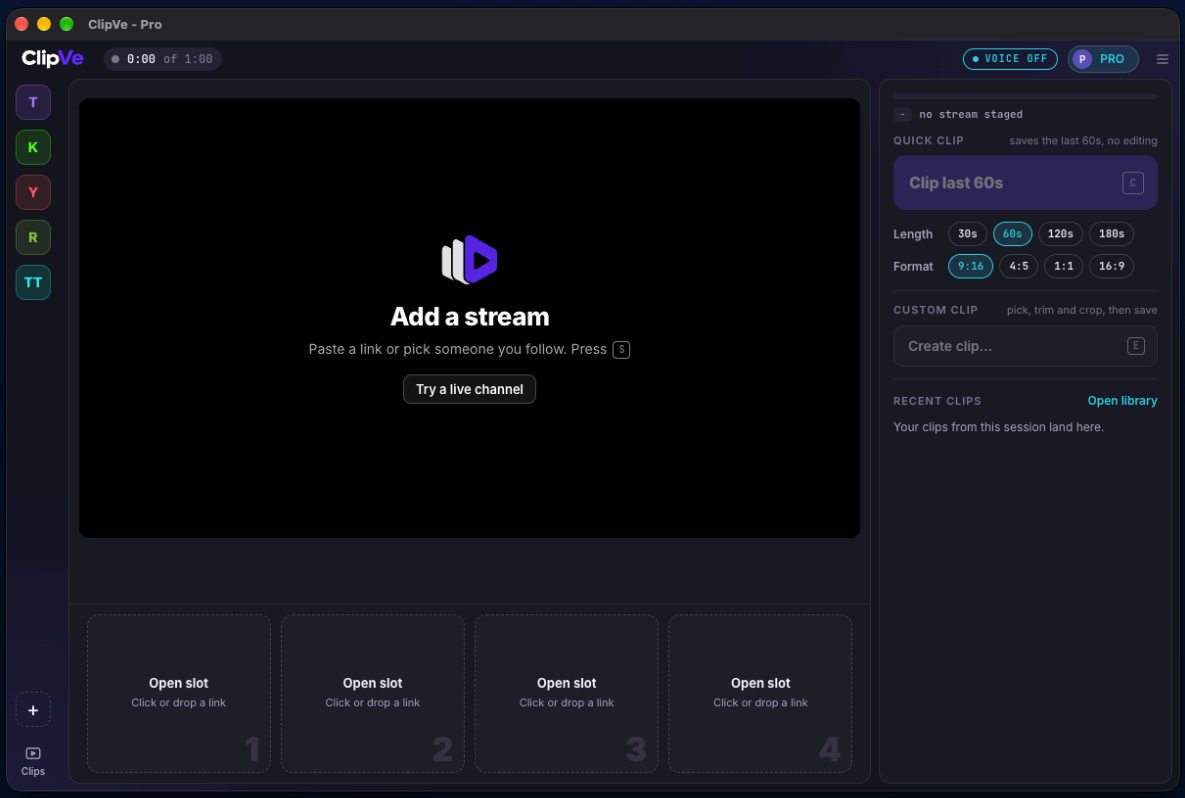

Something pops off? Press `C` and it's already saved. Go back up to 10 minutes.

2

Clip from anywhere.

A global shortcut saves a clip from any app, even mid-game: `Cmd+Shift+C` on Mac, `Alt+Shift+C` on Windows.

3

Add a stream in seconds.

Type a channel name, paste a link or drag one in.

4

Shape it for short-form.

Crop to 9:16 for TikTok, Shorts and Reels, or go 4:5, 1:1 or 16:9. Add a stacked face cam and styled text right on the clip.

5

Voice Clip

Say "ClipVe that" and it clips hands-free. Listening happens on your computer.

6

Send to phone

Scan a QR code and the clip lands on your phone over your own Wi-Fi.

7

Your clips, your files.

Every clip is an MP4 in a folder you pick. Search, sort and drag clips into any app. Nothing is uploaded to the cloud.

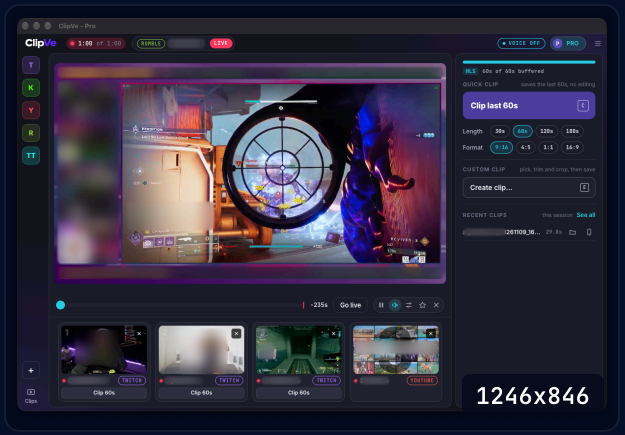

8

04

Screenshots

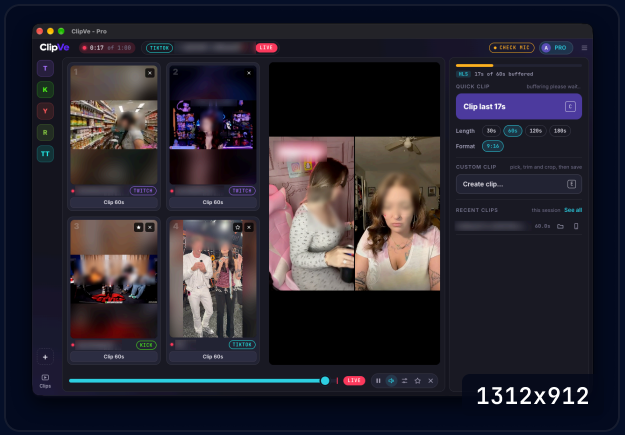

Straight from the deck.

Real captures from the ClipVe app. Names, chat and faces are blurred. Crop if you need to, but do not stretch.

November 5, 2026

ClipVe adds TikTok LIVE

ClipVe now clips TikTok LIVE alongside Twitch, Kick, YouTube and Rumble.

Press release, October 17, 2026

Nemexis launches ClipVe, a desktop app for clipping live streams after the moment happens

Now live on Mac and Windows for Twitch, Kick, YouTube and Rumble. Free to start, no account needed.

DULUTH, Ga., October 17, 2026. Nemexis, LLC today launched ClipVe, a desktop app for Mac and Windows built for clippers and streamers who need to catch a moment the second it happens.

Live moments don't wait. Platform clip tools are limited, and pulling clips out of a four-hour VOD after the stream ends means the moment is already old. ClipVe holds a rolling buffer of each stream on the user's computer, so the moment is still there after it happens.

What ClipVe does:

- Watch up to five streams at once across Twitch, Kick, YouTube and Rumble
- Clip what already happened from a rolling buffer of each stream
- Crop to vertical, stack the face cam over gameplay, add text and save an MP4 ready for TikTok, Shorts or Reels
- Clip hands-free by saying "ClipVe that"
- Everything stays local. No uploads, no cloud, no OBS

> **"A great moment on a stream is whatever the person watching says it is. ClipVe keeps the stream on your machine, so when the moment happens you clip it, crop it and post it before chat has moved on."**
>
> Patrick Vanderhorst, Founder, ClipVe

ClipVe is free to download at clipve.com with no account required. Founding members get ClipVe Pro for $5 a month or $49 a year, locked in for as long as they stay subscribed, or $149 once for Founder Lifetime. Founder pricing runs until Jan. 1, 2027, or until founder spots run out.

About Nemexis, LLC: Nemexis, LLC is an independent software company in Duluth, Georgia, founded by Patrick Vanderhorst. It builds fast, privacy-first desktop tools for creators.
